Stedman's Medical Dictionary

teratoma (ter-a-to'ma)

A neoplasm composed of multiple tissues, including tissues not normally found in the organ in which it arises. *T.*'s occur most frequently in the ovary, where they are usually benign and form dermoid cysts; in the testis, where they are usually malignant; and, uncommonly, in other sites, especially the midline of the body.teratoid tumor; [terato- + G. -oma, tumor]

t. or'bitae orbitopagus

sacroccygeal t. found in the region of the primitive pit and node. Most common tumor in the newborn period.

triphyllomatous t. a *t.* composed of tissues derived from all three germ layers, i.e., a teratoma.tridermoma;
